

## Human Iba-1 ELISA Kit | Iba-1 elisa kit

Human Iba-1 ELISA Kit

CATALOG #  
**AAA205611**

REACTIVITY  
**Human**

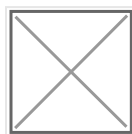

### PRODUCT SYNONYMS

Iba-1; Human Iba-1 ELISA Kit; Iba-1 elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 187.5 pg/ml-3000 pg/ml                                            |
| Sensitivity     | 10 pg/ml                                                          |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for Iba-1 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human Iba-1 in the sample, This Human Iba-1 Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Human Iba-1 concentration. The concentration of Human Iba-1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
