

Mouse Pregnancy Associated Plasma Protein A (PAPPA) ELISA Kit | PAPPA elisa kit

Mouse Pregnancy Associated Plasma Protein A (PAPPA) ELISA Kit

CATALOG #
AAA20592

REACTIVITY
Mouse

PRODUCT SYNONYMS

Pregnancy Associated Plasma Protein A (PAPPA); Mouse Pregnancy Associated Plasma Protein A (PAPPA) ELISA Kit; PAPP-A; PAPA; ASBABP2; DIPLA1; IGFBP-4ase; PAPPA1; Pappalysin 1; Insulin-Like Growth Factor Binding Protein-4 Protease; Differentially Placenta 1 Expressed Protein; PAPPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of PAPPA. No significant cross-reactivity or interference between PAPPA and analogues was observed.
Sequence Length	200
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates and other biological fluids
Detection Range	78-5,000pg/mL
Sensitivity	29pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level PAPPA were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level PAPPA were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for PAPPA elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of PAPPA in mouse serum, plasma, tissue homogenates and other biological fluids. Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to PAPPA. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to PAPPA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain PAPPA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of PAPPA in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for PAPPA elisa kit	Reproductive science; Genetic science

NCBI AND UNIPROT INFORMATION

NCBI GI #	71025082
Molecular Weight	23,055 Da
NCBI Official Full Name	pregnancy associated plasma protein A, partial
UniProt Protein Name	Pregnancy associated plasma protein A
UniProt Entry Name	Q45XF7_PIG

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
