

Human Epstein-Barr Virus Early Antigen IgG ELISA Kit

Human Epstein-Barr Virus Early Antigen IgG Antibody ELISA Kit

CATALOG #
AAA205955

REACTIVITY
Human

PRODUCT SYNONYMS

Epstein-Barr Virus Early Antigen IgG; Human Epstein-Barr Virus Early Antigen IgG Antibody ELISA Kit; Epstein-Barr Virus Early Antigen IgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	50ng/ml-800ng/ml
Sensitivity	1 ng/ml

ADDITIONAL INFORMATION

Related Product Information for Epstein-Barr Virus Early Antigen IgG elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of EPSTEIN-BARR VIRUS EARLY ANTIGEN IGG ANTIBODY in the sample, This EPSTEIN-BARR VIRUS EARLY ANTIGEN IGG ANTIBODY ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus EPSTEIN-BARR VIRUS EARLY ANTIGEN IGG ANTIBODY concentration. The concentration of EPSTEIN-BARR VIRUS EARLY ANTIGEN IGG ANTIBODY in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
