

Human Pro Surfactant Associated Protein B ELISA Kit

Human Pro Surfactant Associated Protein B ELISA Kit

CATALOG #
AAA205997

REACTIVITY
Human

PRODUCT SYNONYMS

Pro Surfactant Associated Protein B; Human Pro Surfactant Associated Protein B ELISA Kit; Pro Surfactant Associated Protein B elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	6.25ng/ml-100ng/ml
Sensitivity	0.1 ng/ml

ADDITIONAL INFORMATION

Related Product Information for Pro Surfactant Associated Protein B elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of PRO SURFACTANT ASSOCIATED PROTEIN B in the sample, This PRO SURFACTANT ASSOCIATED PROTEIN B ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus PRO SURFACTANT ASSOCIATED PROTEIN B concentration. The concentration of PRO SURFACTANT ASSOCIATED PROTEIN B in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
