

Human Involucrin (INV) ELISA Kit | INV elisa kit

Human Involucrin (INV) ELISA Kit

CATALOG #
AAA206344

REACTIVITY
Human

PRODUCT SYNONYMS

Involucrin (INV); Human Involucrin (INV) ELISA Kit; INV elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	425
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	5ng/ml-80ng/ml
Sensitivity	0.1 ng/ml

ADDITIONAL INFORMATION

Related Product Information for INV elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of INV in the sample, This INVELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus INV concentration. The concentration of INV in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1314986054
NCBI Accession #	XP_023174920.1
NCBI GenBank Nucleotide #	XP_023174920.1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
