

## Mouse Acetyl CoA Carboxylase (AACase) ELISA Kit | AACase elisa kit

Mouse Acetyl CoA Carboxylase (AACase) ELISA Kit

CATALOG #  
**AAA207082**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Acetyl CoA Carboxylase (AACase); Mouse Acetyl CoA Carboxylase (AACase) ELISA Kit; AACase elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Mouse                                                             |
| Sequence Length | 146                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 50 pmol/L-800 pmol/L                                              |
| Sensitivity     | 1 pmol/L                                                          |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for AACase elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of AACase in the sample, This AACase ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus AACase concentration. The concentration of AACase in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |                        |
|-------------------------|------------------------|
| NCBI GI #               | 952352610              |
| NCBI Official Full Name | acetyl Coa carboxylase |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
