Related Product Information for Acyl CoA Dehydrogenases elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of ACYL COA DEHYDROGENASES in the sample, This ACYL COA DEHYDROGENASES ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus ACYL COA DEHYDROGENASES concentration. The concentration of ACYL COA DEHYDROGENASES in the samples is then determined by comparing the O.D. of the samples to the standard curve.
