

## Mouse Protein Kinase A ELISA Kit

Mouse Protein Kinase A ELISA Kit

CATALOG #  
**AAA207725**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Protein Kinase A; Mouse Protein Kinase A ELISA Kit; Protein Kinase A elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Mouse                                                             |
| Sequence Length | 390                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 2 pmol/L-32 pmol/L                                                |
| Sensitivity     | 0.1 pmol/L                                                        |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for Protein Kinase A elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Mouse Protein kinase A in the sample, This Mouse Protein kinase A Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Mouse Protein kinase A concentration. The concentration of Mouse Protein kinase A in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |                  |
|-------------------------|------------------|
| NCBI GI #               | 349929923        |
| NCBI Official Full Name | protein kinase A |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
