

Human Suprabasin (SBSN) ELISA Kit | SBSN elisa kit

Human Suprabasin (SBSN) ELISA Kit

CATALOG #
AAA20782

REACTIVITY
Human

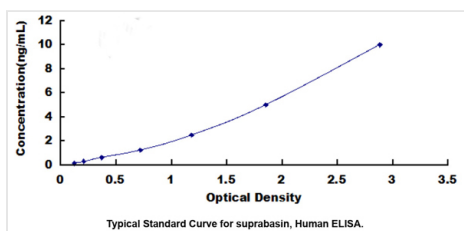

PRODUCT SYNONYMS

Suprabasin (SBSN); Human Suprabasin (SBSN) ELISA Kit; SBSN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of suprabasin. No significant cross-reactivity or interference between suprabasin and analogues was observed.
Sequence Length	590
Assay Type	Quantitative Sandwich
Samples	Human tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.055ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level suprabasin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level suprabasin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SBSN elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to suprabasin. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to suprabasin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain suprabasin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of suprabasin in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of suprabasin in human tissue homogenates, cell lysates, cell culture supernates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	260436922
NCBI GeneID	374897
NCBI Accession #	NP_001159506.1
NCBI GenBank Nucleotide #	NM_001166034.1
Molecular Weight	25,335 Da
NCBI Official Full Name	suprabasin isoform 1
NCBI Official Synonym Full Names	suprabasin
NCBI Official Symbol	SBSN
NCBI Official Synonym Symbols	UNQ698
NCBI Protein Information	suprabasin
UniProt Protein Name	Suprabasin
UniProt Gene Name	SBSN
UniProt Entry Name	SBSN_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
