

## Mouse N-acetylglucosaminyltransferase I ELISA Kit

Mouse N-acetylglucosaminyltransferase I ELISA Kit

CATALOG #  
**AAA207889**

REACTIVITY  
**Mouse**

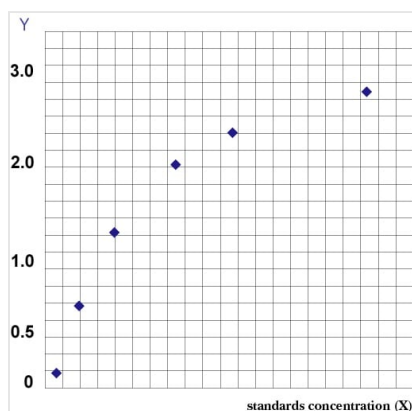

### PRODUCT SYNONYMS

N-acetylglucosaminyltransferase I; Mouse N-acetylglucosaminyltransferase I ELISA Kit; N-acetylglucosaminyltransferase I elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Mouse                                                             |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 6.25 U/L-100 U/L                                                  |
| Sensitivity     | 0.1 U/L                                                           |

### ADDITIONAL INFORMATION

#### Related Product Information for N-acetylglucosaminyltransferase I elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of N-ACETYLGLUCOSAMINYLTRANSFERASE I in the sample, This N-ACETYLGLUCOSAMINYLTRANSFERASE I ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus N-ACETYLGLUCOSAMINYLTRANSFERASE I concentration. The concentration of N-ACETYLGLUCOSAMINYLTRANSFERASE I in the samples is then determined by comparing the O.D. of the samples to the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
