

## Mouse Gd-IgA1 ELISA Kit | Gd-IgA1 elisa kit

Mouse Gd-IgA1 ELISA Kit

CATALOG #  
**AAA207910**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Gd-IgA1; Mouse Gd-IgA1 ELISA Kit; Gd-IgA1 elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Mouse                                                             |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 50 U/mL-800 U/mL                                                  |
| Sensitivity     | 1 U/ml                                                            |

### ADDITIONAL INFORMATION

#### Related Product Information for Gd-IgA1 elisa kit

**Intended Use:** The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Gd-IgA1 in the sample, This Gd-IgA1 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Gd-IgA1 concentration. The concentration of Gd-IgA1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
