

## Mouse Histone ELISA Kit | PH1782.1 elisa kit

Mouse Histone Antibody ELISA Kit

CATALOG #  
**AAA208086**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Histone; Mouse Histone Antibody ELISA Kit; PH1782.1 elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Mouse                                                             |
| Sequence Length | 67                                                                |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 5ng/ml-80ng/ml                                                    |
| Sensitivity     | 0.1 ng/ml                                                         |

### ADDITIONAL INFORMATION

Related Product Information for  
PH1782.1 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of HISTONE ANTIBODY in the sample, This HISTONE ANTIBODY ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus HISTONE ANTIBODY concentration. The concentration of HISTONE ANTIBODY in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                  |                |
|------------------|----------------|
| NCBI GI #        | 850865316      |
| NCBI Accession # | WP_048053612.1 |

|                           |                                |
