

Mouse Inosincacid,inosinemonphosphate (IMP) ELISA Kit | IMP elisa kit

Mouse Inosincacid,inosinemonphosphate (IMP) ELISA Kit

CATALOG #
AAA208431

REACTIVITY
Mouse

PRODUCT SYNONYMS

Inosincacid; inosinemonphosphate (IMP); Mouse Inosincacid; inosinemonphosphate (IMP) ELISA Kit; IMP; IMP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Sensitivity	10 pg/ml

IMAGES

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for IMP elisa kit

Intended Uses: This IMP ELISA kit is intended Laboratory for Research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of IMP in the sample, this IMP ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus IMP concentration. The concentration of IMP in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
