Intended Uses: ThisCasp-12kit is intended Laboratory for Research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration ofCasp-12in the sample, thisCasp-12Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versusCasp-12concentration. The concentration ofCasp-12in the samples is then determined by comparing the O.D. of the samples to the standard curve.
