

## Rat Indoleamine 2,3-Dioxygenase ELISA Kit

Rat Indoleamine 2,3-Dioxygenase ELISA Kit

CATALOG #  
AAA209923

REACTIVITY  
Rat

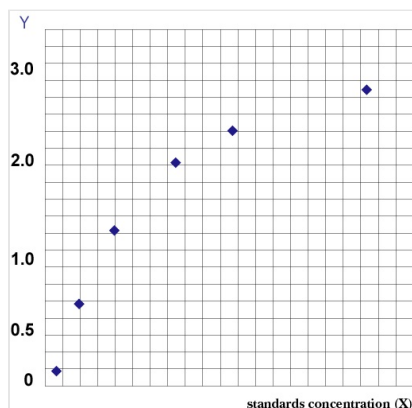

### PRODUCT SYNONYMS

Indoleamine 2; 3-Dioxygenase; Rat Indoleamine 2; 3-Dioxygenase ELISA Kit; 3-Dioxygenase elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Rat                                                               |
| Sequence Length | 452                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 125 pg/ml-2000 pg/ml                                              |
| Sensitivity     | 10 pg/ml                                                          |

### ADDITIONAL INFORMATION

#### Related Product Information for Indoleamine 2,3-Dioxygenase elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of INDOLEAMINE 2,3-DIOXYGENASE in the sample, This INDOLEAMINE 2,3-DIOXYGENASE ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus INDOLEAMINE 2,3-DIOXYGENASE concentration. The concentration of INDOLEAMINE 2,3-DIOXYGENASE in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |                             |
|-------------------------|-----------------------------|
| NCBI GI #               | 924125570                   |
| NCBI Official Full Name | indoleamine 2,3-dioxygenase |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
