

## Rat Dopamine Beta Hydroxylase (DBH/beta-DH) ELISA Kit | DBH/beta-DH elisa kit

Rat Dopamine Beta Hydroxylase (DBH/beta-DH) ELISA Kit

|                               |                          |
|-------------------------------|--------------------------|
| CATALOG #<br><b>AAA210343</b> | REACTIVITY<br><b>Rat</b> |
|-------------------------------|--------------------------|

### PRODUCT SYNONYMS

Dopamine Beta Hydroxylase (DBH/beta-DH); Rat Dopamine Beta Hydroxylase (DBH/beta-DH) ELISA Kit; DBH/beta-DH elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Rat                                                               |
| Sequence Length | 619                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 2.5 U/L-40 U/L                                                    |
| Sensitivity     | 0.1 U/L                                                           |

### ADDITIONAL INFORMATION

|                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for<br>DBH/beta-DH elisa kit | Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of DBH/beta-DH in the sample, This DBH/beta-DH Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus DBH/beta-DH concentration. The concentration of DBH/beta-DH in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
