

Rat Nuclear Factor-kappa B P50 ELISA Kit

Rat Nuclear Factor-kappa B P50 ELISA Kit

CATALOG #
AAA210524

REACTIVITY
Rat

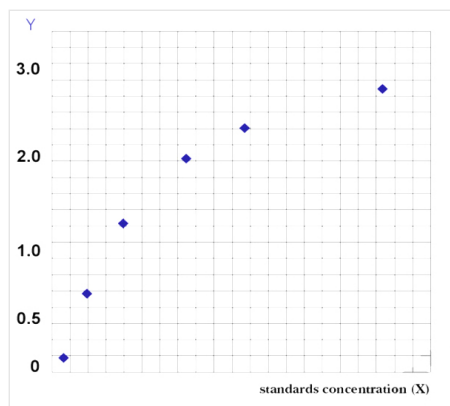

PRODUCT SYNONYMS

Nuclear Factor-kappa B P50; Rat Nuclear Factor-kappa B P50 ELISA Kit; Nuclear Factor-kappa B P50 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Sensitivity	0.1 ng/mL
Intra-assay Precision	Intra-assay CV is less than 15%.
Inter-assay Precision	Inter-assay CV is less than 15%.

Related Product Information for Nuclear Factor-kappa B P50 elisa kit

Intended Uses: This NF-KB p50 ELISA kit is intended Laboratory for Research use only and is not for use in test or therapeutic procedures. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of NF-KB p50 in the sample, this NF-KB p50 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus NF-KB p50 concentration. The concentration of NF-KB p50 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
