

Human Rubella virus IgG (RV IgG) ELISA Kit | RV IgG elisa kit

Human rubella virus IgG (RV IgG) ELISA Kit

CATALOG #
AAA210630

REACTIVITY
Human

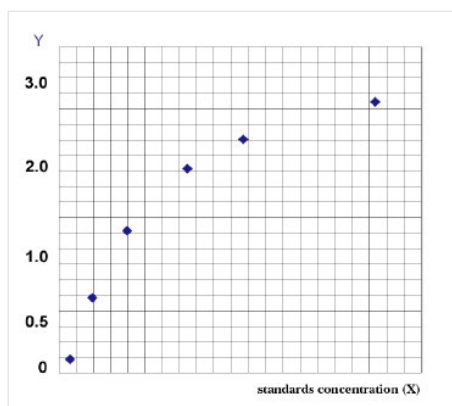

PRODUCT SYNONYMS

Rubella virus IgG (RV IgG); Human rubella virus IgG (RV IgG) ELISA Kit; RV IgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Preparation and Storage	Store at 2 to 8 degree C

ADDITIONAL INFORMATION

Related Product Information for RV IgG elisa kit

Intended Uses: This RV IGG ELISA kit is intended Laboratory for Research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of RV IGG in the sample, this RV IGG ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus RV IGG concentration. The concentration of RV IGG in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
