

General TNFalpha McAb ELISA Kit | TNFalpha elisa kit

TNFalpha McAb quantitative detection ELISA Kit

CATALOG #
AAA210643

REACTIVITY
General

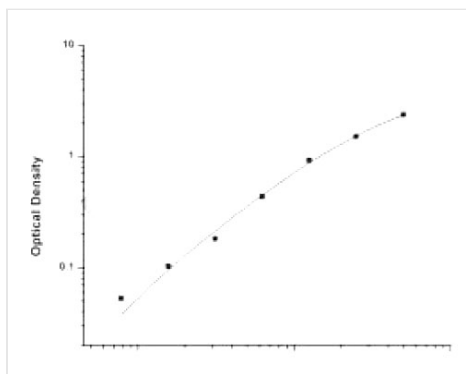

PRODUCT SYNONYMS

TNFalpha McAb; TNFalpha McAb quantitative detection ELISA Kit; TNFalpha elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This kit identifies natural and recombinant TNFalpha MCAB, with No crossing with structural analogs.
Assay Type	Sandwich
Samples	Serum, plasma, and cell culture supernatant
Detection Range	0.3125 ng/mL - 10 ng/mL
Sensitivity	< 0.25ng/mL
Intra-assay Precision	In the same lot CV%<10?3 groups of known high, medium, and low concentration samples were evaluated 20 times on the same plate.
Inter-assay Precision	Different lot CV%<15: 3 groups of known high, medium, and low concentration samples were evaluated 20 times on different plates.

ADDITIONAL INFORMATION

Related Product Information for TNFalpha elisa kit	Principle of the Assay: This kit applies the indirect method (ELISA). The microtiter plate has been pre-coated with TNFalpha MCAB antigen (solid phase antigen), standards or samples are added to the microtiter plate wells, then add anti-human IgG HRP labeled antibody. Wells are thoroughly washed to remove all unbound components. And a sandwich complex of solid antigen-antibody enzyme-labeled secondary antibodies is formed on the solid surface of the microplate. Next, Substrate solution A and substrate solution B are added to each well, and it will produce blue materials under HRP catalysis. The enzyme-substrate reaction is terminated by the addition of sulphuric acid and the color change to yellow. Measured spectrophotometrically at a wavelength of 450 nm, the absorbance (OD value) is positively correlated with the concentration of TNFalpha MCAB in the sample. The concentration of TNFalpha MCAB in the samples could be determined by comparing the O.D. of the samples to the standard curve. Intended Uses: This kit is used for detecting the TNFalpha MCAB concentration of serum, plasma, and cell culture supernatant.
