

General Ovalbumin antigen (OVA) ELISA Kit | OVA elisa kit

Ovalbumin antigen (OVA) ELISA Kit

CATALOG #
AAA210650

REACTIVITY
General

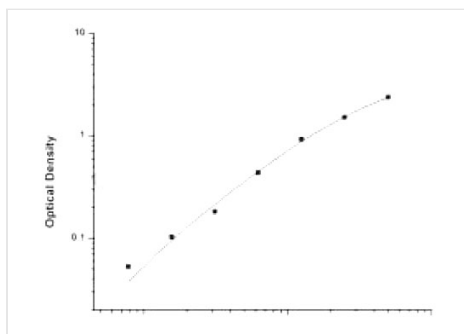

PRODUCT SYNONYMS

Ovalbumin antigen (OVA); Ovalbumin antigen (OVA) ELISA Kit; OVA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This kit identifies natural and recombinant OVA, with No crossing with structural analogs.
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, and cell culture supernatant
Detection Range	0.5 ng/mL-8 ng/mL
Sensitivity	< 0.1 ng/ml
Intra-assay Precision	In the same lot CV%<10?3 groups of known high, medium, and low concentration samples were evaluated 20 times on the same plate.
Inter-assay Precision	Different lot CV%<15: 3 groups of known high, medium, and low concentration samples were evaluated 20 times on different plates.

ADDITIONAL INFORMATION

Related Product Information for OVA elisa kit	Principle of the Assay: This ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with OVA antibody (solid phase antigen), standards or samples are added to the microtiter plate wells, then add anti-OVA HRP labeled antibody. Wells are thoroughly washed to remove all unbound components. And a sandwich complex of solid antigen-antibody enzyme-labeled secondary antibodies is formed on the solid surface of the microplate. Next, Substrate solution A and substrate solution B are added to each well, and it will produce blue materials under HRP catalysis. The enzyme-substrate reaction is terminated by the addition of sulphuric acid and the color change to yellow. Measured spectrophotometrically at a wavelength of 450 nm, the absorbance (OD value) is positively correlated with the concentration of OVA in the sample. The concentration of OVA in the samples could be determined by comparing the O.D. of the samples to the standard curve. Intended Uses: This kit is used for detecting the OVA concentration of serum, plasma, and cell culture supernatant.
