

Mouse anti-Human hepatitis B virus surface antigen IgG2b (HBsAg IgG2b) ELISA Kit | HBsAg elisa kit

Mouse anti-Human hepatitis B virus surface antigen IgG2b (HBsAg IgG2b) quantitative detection ELISA Kit

CATALOG #
AAA210679

REACTIVITY
Mouse

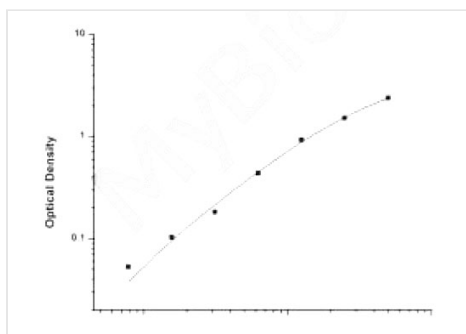

PRODUCT SYNONYMS

anti-Human hepatitis B virus surface antigen IgG2b (HBsAg IgG2b); Mouse anti-Human hepatitis B virus surface antigen IgG2b (HBsAg IgG2b) quantitative detection ELISA Kit; HBsAg elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit identifies natural and recombinant Mouse HBsAg IgG2b, with No crossing with structural analogs.
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, and cell culture supernatant
Detection Range	0.25 ng/ml - 8 ng/ml
Sensitivity	< 0.1 ng/ml
Intra-assay Precision	In the same lot CV%<10?3 groups of known high, medium, and low concentration samples were evaluated 20 times on the same plate.
Inter-assay Precision	Different lot CV%<15: 3 groups of known high, medium, and low concentration samples were evaluated 20 times on different plates.

ADDITIONAL INFORMATION

Related Product Information for HBsAg elisa kit	Principle of the Assay: This ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with Mouse HBsAg IgG2b antigen (solid phase antigen), standards or samples are added to the microtiter plate wells, then add anti- Mouse HBsAg IgG2b HRP labeled antibody. Wells are thoroughly washed to remove all unbound components. And a sandwich complex of solid antigen-antibody enzyme-labeled secondary antibodies is formed on the solid surface of the microplate. Next, Substrate solution A and substrate solution B are added to each well, and it will produce blue materials under HRP catalysis. The enzyme-substrate reaction is terminated by the addition of sulphuric acid and the color change to yellow. Measured spectrophotometrically at a wavelength of 450 nm, the absorbance (OD value) is positively correlated with the concentration of Mouse HBsAg IgG2b in the sample. The concentration of HBsAg IgG2b in the samples could be determined by comparing the O.D. of the samples to the standard curve. Intended Uses: This kit is used for detecting the Mouse HBsAg IgG2b concentration of serum, plasma, and cell culture supernatant.
