

Mouse anti-human Herpes simplex virus I IgG (HSV1 IgG) ELISA Kit | HSV1 elisa kit

Mouse anti-human Herpes simplex virus I IgG (HSV1 IgG) quantitative detection ELISA Kit

CATALOG #
AAA210683

REACTIVITY
Mouse

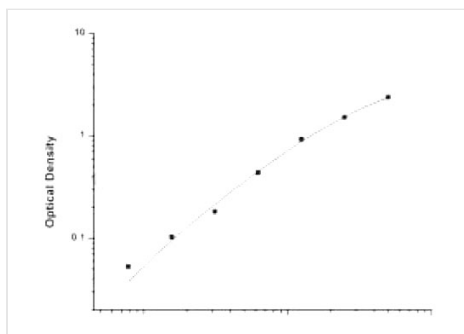

PRODUCT SYNONYMS

anti-human Herpes simplex virus I IgG (HSV1 IgG); Mouse anti-human Herpes simplex virus I IgG (HSV1 IgG) quantitative detection ELISA Kit; HSV1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit identifies natural and recombinant Mouse HSV1 IgG, with No crossing with structural analogs.
Assay Type	Sandwich
Samples	Serum, plasma, and cell culture supernatant
Detection Range	0.25 ng/ml - 8 ng/ml
Sensitivity	< 0.1 ng/ml
Intra-assay Precision	In the same lot CV%<10?3 groups of known high, medium, and low concentration samples were evaluated 20 times on the same plate.
Inter-assay Precision	Different lot CV%<15: 3 groups of known high, medium, and low concentration samples were evaluated 20 times on different plates.

ADDITIONAL INFORMATION

Related Product Information for HSVI elisa kit	Principle of the Assay: This ELISA kit applies the indirect technique. The microtiter plate has been pre-coated with Human Herpes simplex virus (solid phase antigen), standards or samples are added to the microtiter plate wells, then add labeled Mouse second antibody. Wells are thoroughly washed to remove all unbound components. And a sandwich complex of solid antigenantibody enzyme-labeled secondary antibodies is formed on the solid surface of the microplate. Next, Substrate solution A and substrate solution B are added to each well, and it will produce blue materials under HRP catalysis. The enzyme-substrate reaction is terminated by the addition of sulphuric acid and the color change to yellow. Measured spectrophotometrically at a wavelength of 450 nm, the absorbance (OD value) is positively correlated with the concentration of Mouse HSVI IgG in the sample. The concentration of HSVI IgG in the samples could be determined by comparing the O.D. of the samples to the standard curve. Intended Uses: This kit is used for detecting the Mouse HSVI IgG concentration of serum, plasma, and cell culture supernatant.
