

Human Fructosamine-3-Kinase (FN3K) ELISA Kit | FN3K elisa kit

Human Fructosamine-3-Kinase (FN3K) Mini Samples ELISA Kit

CATALOG #
AAA21074

REACTIVITY
Human

PRODUCT SYNONYMS

Fructosamine-3-Kinase (FN3K); Human Fructosamine-3-Kinase (FN3K) Mini Samples ELISA Kit; FN3K elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of FN3K. No significant cross-reactivity or interference between FN3K and analogues was observed.
Sequence Length	309
Assay Type	Quantitative Sandwich
Samples	Human tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.115ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level FN3K were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level FN3K were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%

ADDITIONAL INFORMATION

Related Product Information for FN3K elisa kit

Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to FN3K. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to FN3K. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain FN3K, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of FN3K in the samples is then determined by comparing the O.D. of the samples to the standard curve.

Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of FN3K in human tissue homogenates, cell lysates, cell culture supernates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	11545906
NCBI GeneID	64122
NCBI Accession #	NP_071441.1
NCBI GenBank Nucleotide #	NM_022158.3
UniProt Accession #	Q9H479
Molecular Weight	35,171 Da
NCBI Official Full Name	fructosamine-3-kinase
NCBI Official Synonym Full Names	fructosamine 3 kinase
NCBI Official Symbol	FN3K
NCBI Protein Information	fructosamine-3-kinase
UniProt Protein Name	Fructosamine-3-kinase
UniProt Gene Name	FN3K

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
