IHC (Immunohistochemistry)

Detection of human HNF1-alpha by immunohistochemistry. Samples: FFPE serial sections of human ovarian carcinoma. Antibody: Affinity purified rabbit anti-HNF1-alpha (Cat. No. AAA212477 Lot1, Lot1, Lot1, and Lot1) used at a dilution of 1:5,000 (0.2ug/ml). Detection: DAB. Counterstain: Hematoxylin (blue).

IP (Immunoprecipitation)

Detection of human HNF1-alpha by western blot of immunoprecipitates. Samples: Whole cell lysate (1 mg for IP; 20% of IP loaded) from Hep G2 cells. Antibodies: Affinity purified rabbit anti-HNF1-alpha antibody AAA212477 (lot AAA212477-1) used for IP at 6 ug/mg lysate. HNF1-alpha was also immunoprecipitated by rabbit anti-HNF1-alpha antibodies

ADDITIONAL INFORMATION

Related Product Information for anti-HNF1-alpha antibody	Hepatocyte nuclear factor 1-alpha (HNF1-Alpha) is a transcription factor required for the expression of several liver-specific genes. HNF1-Alpha functions as a homodimer and binds to the inverted palindrome 5'-GTTAATNATTAAC-3'. Defects in the HNF1A gene are a cause of maturity onset diabetes of the young type 3 (MODY3) and also can result in the appearance of hepatic adenomas [taken from NCBI Entrez Gene (Gene ID: 6927)].
