IMAGES

WB (Western Blot)

Detection of human TARS by western blot. Samples: Whole cell lysate (50 ug) from HeLa, HEK293T, and Jurkat cells prepared using NETN lysis buffer. Antibodies: Affinity purified rabbit anti-TARS antibody AAA212914 (lot AAA212914-1) used for WB at 0.1 ug/ml.

Detection: Chemiluminescence with an exposure time of 10 seconds.

IP (Immunoprecipitation)

Detection of human TARS by western blot of immunoprecipitates. Samples: Whole cell lysate (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) from 293T cells prepared using NETN lysis buffer. Antibodies: Affinity purified rabbit anti-TARS antibody AAA212914 (lot AAA212914-1) used for IP at 6 ug per reaction. TARS was also immunoprecipitated by rabbit anti-TARS antibody For blotting immunoprecipitated TARS, AAA212914 was used at 0.4 ug/ml.

Detection: Chemiluminescence with an exposure time of 10 seconds.

ADDITIONAL INFORMATION

Related Product Information for anti-TARS antibody	Aminoacyl-tRNA synthetases catalyze the aminoacylation of tRNA by their cognate amino acid. Because of their central role in linking amino acids with nucleotide triplets contained in tRNAs, aminoacyl-tRNA synthetases are thought to be among the first proteins that appeared in evolution. Threonyl-tRNA synthetase (TARS) belongs to the class-II aminoacyl-tRNA synthetase family [taken from NCBI Entrez Gene (Gene ID: 6897)].
