| Applicable Applications for anti-hnRNP-H antibody | IHC (Immunohistochemistry)                                                                                                                                        |
| Predicted Reactivity                              | Rat, Dog, Horse, Rabbit, Pig, Orangutan, Monkey, Gorilla, Chimpanzee, White-tufted-ear marmoset, African elephant, Gray short-tailed opossum, Crab-eating macaque |
| Immunogen                                         | Between 399 and C-terminus                                                                                                                                        |
| Conjugation                                       | Unconjugated                                                                                                                                                      |
| Preparation and Storage                           | Store at 2-8 degree C<br>Shelf Life: 1 year from date of receipt                                                                                                  |

### IMAGES

#### IHC (Immunohistochemistry)

Detection of mouse hnRNP-H by immunohistochemistry. Sample: FFPE section of mouse squamous cell carcinoma. Antibody: Affinity purified rabbit anti-hnRNP-H (Cat. No. AAA213784) used at a dilution of 1:250. Detection: DAB

#### IHC (Immunohistochemistry)

Detection of human hnRNP-H by immunohistochemistry. Sample: FFPE section of human prostate adenocarcinoma. Antibody: Affinity purified rabbit anti-hnRNP-H (Cat. No. AAA213784) used at a dilution of 1:250. Detection: DAB staining using anti-rabbit IHC antibody (Cat. No. at a dilution of 1:100.

ADDITIONAL INFORMATION

|                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-hnRNP-H antibody | Heterogeneous nuclear ribonucleoprotein H (hnRNP-H) belongs to a group of ubiquitously expressed heterogeneous nuclear ribonucleoproteins (hnRNPs) that bind and complex with heterogeneous nuclear RNA (hnRNA) and play a role in pre-mRNA processing and transport. hnRNP-H binds specific cis-sequence elements on pre-mRNA and functions as an accessory factor for splicing by influencing small nuclear ribonucleoprotein (snRNP) binding. |
| Product Categories/Family for anti-hnRNP-H antibody   | Primary Antibodies                                                                                                                                                                                                                                                                                                                                                                                                                               |
