

Monkey GH ELISA Kit | GH elisa kit

Monkey GH (Growth Hormone) ELISA Kit

CATALOG #
AAA21417

REACTIVITY
Monkey

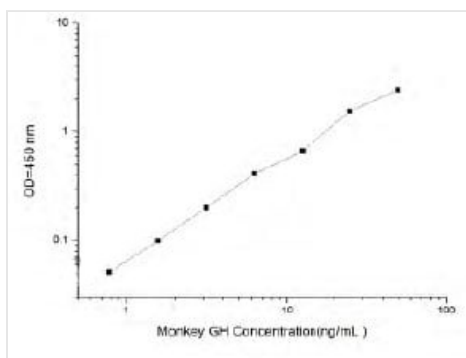

PRODUCT SYNONYMS

GH; Monkey GH (Growth Hormone) ELISA Kit; GH1; GH-N; GHN; hGH-N; Somatotropin; GH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This kit recognizes Monkey GH in samples. No Significant cross-reactivity or interference between Monkey GH and analogues was observed.
Sequence Length	852
Samples	Serum, plasma and other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	0.78-50 ng/mL
Sensitivity	0.47 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Monkey GH were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Monkey GH were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for GH elisa kit	Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Monkey GH concentrations in serum, plasma and other biological fluids. Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Monkey GH. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Monkey GH and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Monkey GH, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Monkey GH. You can calculate the concentration of Monkey GH in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	833831
Molecular Weight	96,787 Da
NCBI Official Full Name	gH
UniProt Protein Name	GH
UniProt Gene Name	gH
UniProt Entry Name	Q66030_9ALPH

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
