

## Rat ELN ELISA Kit | ELN elisa kit

Rat ELN (Elastin) ELISA Kit

CATALOG #  
**AAA21504**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

ELN; Rat ELN (Elastin) ELISA Kit; ELN elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                              |
| Specificity             | This kit recognizes natural and recombinant Rat ELN. No significant cross-reactivity or interference between Rat ELN and analogues was observed. |
| Sequence Length         | 617                                                                                                                                              |
| Samples                 | Serum, Plasma, Biological Fluids                                                                                                                 |
| Assay Type              | Sandwich                                                                                                                                         |
| Detection Range         | 0.625-40ng/mL                                                                                                                                    |
| Sensitivity             | Min: 0.375ng/mL; Max: 40ng/mL                                                                                                                    |
| Preparation and Storage | Store at 4 degree C.                                                                                                                             |

| Related Product Information for ELN elisa kit | <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Rat ELN concentrations in serum, plasma and other biological fluids.</p> <p>Principle of the Assay  This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to ELN. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for ELN and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain ELN, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of ELN. You can calculate the concentration of ELN in the samples by comparing the OD of the samples to the standard curve.</p> |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
