

Human Major Histocompatibility Complex Class I A (MHCA) RTU ELISA Kit | MHCA rtu elisa kit

Human Major Histocompatibility Complex Class I A (MHCA) ELISA Kit

CATALOG #
AAA217025

REACTIVITY
Human

PRODUCT SYNONYMS

Major Histocompatibility Complex Class I A (MHCA); Human Major Histocompatibility Complex Class I A (MHCA) ELISA Kit; HLA-A; HLAA; MHC-A; Leukocyte Antigen A; HLA class I histocompatibility antigen; A-31 alpha chain; MHCA rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	365
Assay Type	Sandwich
Samples	Tissue Homogenates or Other Biological Fluids.
Detection Range	0.312-20ng/mL
Sensitivity	0.126ng/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for MHCA rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to MHCA. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to MHCA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain MHCA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of MHCA in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	337752170
NCBI GeneID	3105
NCBI Accession #	NP_001229687.1
NCBI GenBank Nucleotide #	NM_001242758.1
UniProt Accession #	P30443; O77964; O78171; Q9MYA3; Q9TP25; Q9TQP5; P01891; P01892; P04439; P05534; P10314; P10316; P13746; P16188; P16189; P16190
Molecular Weight	40,846 Da
NCBI Official Full Name	HLA class I histocompatibility antigen, A-1 alpha chain A*01:01:01:01
NCBI Official Synonym Full Names	major histocompatibility complex, class I, A
NCBI Official Symbol	HLA-A
NCBI Official Synonym Symbols	HLAA
NCBI Protein Information	HLA class I histocompatibility antigen, A-1 alpha chain; LOW QUALITY PROTEIN: HLA class I histocompatibility antigen, A-1 alpha chain
UniProt Protein Name	HLA class I histocompatibility antigen, A-1 alpha chain
UniProt Gene Name	HLA-A
UniProt Synonym Gene Names	HLAA

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
