

General DHVD3 ELISA Kit | DHVD3 elisa kit

DHVD3 (1,25-Dihydroxyvitamin D3) ELISA Kit

CATALOG #
AAA21719

REACTIVITY
General

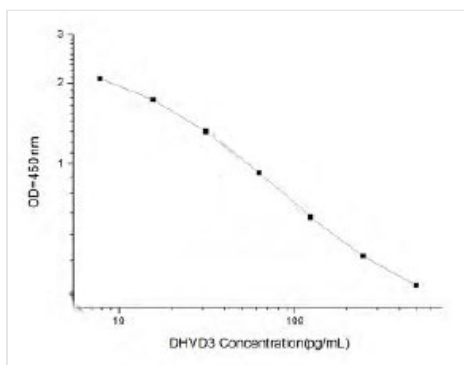

PRODUCT SYNONYMS

DHVD3; DHVD3 (1; 25-Dihydroxyvitamin D3) ELISA Kit; DHVD3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This kit recognizes DHVD3 in samples. No significant cross-reactivity or interference between DHVD3 and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Serum, plasma and other biological fluids
Detection Range	7.81-500pg/mL
Sensitivity	4.69pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level DHVD3 were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level DHVD3 were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for DHVD3 elisa kit	Principle of the Assay: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with DHVD3. During the reaction, DHVD3 in the sample or standard competes with a fixed amount of DHVD3 on the solid phase supporter for sites on the Biotinylated Detection Ab specific to DHVD3. Excess conjugate and unbound sample or standard are washed from the plate, and Avidin conjugated to Horseradish Peroxidase (HRP) are added to each microplate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color change is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The concentration of DHVD3 in the samples is then determined by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of DHVD3 concentrations in serum, plasma and other biological fluids.
