

## Porcine HGF ELISA Kit | HGF elisa kit

Porcine HGF (Hepatocyte Growth Factor) ELISA Kit

CATALOG #  
**AAA21739**

REACTIVITY  
**Porcine**

### PRODUCT SYNONYMS

HGF; Porcine HGF (Hepatocyte Growth Factor) ELISA Kit; HGF elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                            |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Porcine                                                                                                                                                                    |
| Specificity             | This kit recognizes Porcine HGF in samples. No significant cross-reactivity or interference between Porcine HGF and analogues was observed.                                |
| Sequence Length         | 728                                                                                                                                                                        |
| Assay Type              | Quantitative Sandwich                                                                                                                                                      |
| Samples                 | Serum, plasma and other biological fluids                                                                                                                                  |
| Detection Range         | 78.13-5000pg/mL                                                                                                                                                            |
| Sensitivity             | 46.88pg/mL                                                                                                                                                                 |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Porcine HGF were tested 20 times on one plate, respectively.               |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Porcine HGF were tested on 3 different plates, 20 replicates in each plate. |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                                       |

| Related Product Information for HGF elisa kit | <p>Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Porcine HGF. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Porcine HGF and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Porcine HGF, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Porcine HGF. You can calculate the concentration of Porcine HGF in the samples by comparing the OD of the samples to the standard curve.</p> <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Porcine HGF concentrations in serum, plasma and other biological fluids.</p> |
