

Mouse beta-TG ELISA Kit | beta-TG elisa kit

Mouse beta-TG (beta-Thromboglobulin) ELISA Kit

CATALOG #
AAA21760

REACTIVITY
Mouse

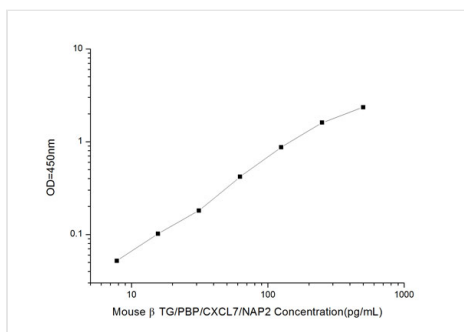

PRODUCT SYNONYMS

beta-TG; Mouse beta-TG (beta-Thromboglobulin) ELISA Kit; beta-TG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit recognizes Mouse betaTG/PBP/CXCL7/NAP2 in samples. No significant cross-reactivity or interference between Mouse betaTG/PBP/CXCL7/NAP2 and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	7.81-500pg/mL
Sensitivity	4.69pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Mouse betaTG/PBP/CXCL7/NAP2 were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Mouse betaTG/PBP/CXCL7/NAP2 were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for beta-TG elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse betaTG/PBP/CXCL7/NAP2. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse betaTG/PBP/CXCL7/NAP2 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse betaTG/PBP/CXCL7/NAP2, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Mouse betaTG/PBP/CXCL7/NAP2. You can calculate the concentration of Mouse betaTG/PBP/CXCL7/NAP2 in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse betaTG/PBP/CXCL7/NAP2 concentrations in serum, plasma and other biological fluids.
---	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
