

Rat Prolactin Induced Protein (PIP) RTU ELISA Kit | PIP rtu elisa kit

Rat Prolactin Induced Protein (PIP) ELISA Kit

CATALOG #
AAA217816

REACTIVITY
Rat

PRODUCT SYNONYMS

Prolactin Induced Protein (PIP); Rat Prolactin Induced Protein (PIP) ELISA Kit; GCDP15; GPI4; BRST2; SABP; gp17; Gross cystic disease fluid protein 15; Prolactin-induced protein; Secretory actin-binding protein; PIP rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Sequence Length	146
Assay Type	Sandwich
Samples	Serum, Plasma or Other Biological Fluids.
Detection Range	46.8-3000pg/mL
Sensitivity	16.23pg/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for PIP rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to PDI. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to PDI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain PDI, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of PDI in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	12083677
NCBI GeneID	64673
NCBI Accession #	NP_073199.1
NCBI GenBank Nucleotide #	NM_022708.2
UniProt Accession #	O70417
Molecular Weight	16,439 Da
NCBI Official Full Name	prolactin-inducible protein homolog
NCBI Official Synonym Full Names	prolactin induced protein
NCBI Official Symbol	Pip
NCBI Protein Information	prolactin-inducible protein homolog
UniProt Protein Name	Prolactin-inducible protein homolog
UniProt Gene Name	Pip

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
