

Human GC ELISA Kit | GC elisa kit

Human GC (Glycocalicin) ELISA Kit

CATALOG #
AAA21877

REACTIVITY
Human

PRODUCT SYNONYMS

GC; Human GC (Glycocalicin) ELISA Kit; GC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes natural and some recombinant Human GC. No significant crossreactivity or interference between Human GC and analogues was observed.
Sequence Length	501
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	0.313-20ng/mL
Sensitivity	Min: 0.188ng/mL; Max: 20ng/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for GC elisa kit	Intended Uses: This ELISA kit can be applied to the in vitro quantitative determination of Human GC concentrations in serum, plasma and other biological fluids. Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been precoated with an antibody specific to Human GC. Standards or samples are added to appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibodies specific for Human GC and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well successively and incubated. After incubation, free components are washed away. Then the Substrate Reagent is added to each well, only those wells that contain Human GC, biotinylated detection antibody and Avidin- HRP conjugate will appear blue in color. The enzyme-substrate reaction will be terminated by adding Stop Solution and appears yellow in color. The optical density (OD) can be measured with spectrophotometry at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Human GC. The concentration of Human GC in samples can be calculated by comparing the OD of the samples with the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	412769
NCBI Official Full Name	gC

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
