

Human PSMA ELISA Kit | PSMA elisa kit

Human PSMA(Prostate specific membrane antigen)ELISA Kit

CATALOG #
AAA21923

REACTIVITY
Human

PRODUCT SYNONYMS

PSMA; Human PSMA(Prostate specific membrane antigen)ELISA Kit; PSMA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes Human PSMA in samples. No significant cross-reactivity or interference between Human PSMA and analogues was observed.
Sequence Length	287
Assay Type	Quantitative Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	4.69-300ng/mL
Sensitivity	2.81ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human PSMA were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human PSMA were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for PSMA elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human PSMA. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human PSMA and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human PSMA, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Human PSMA. You can calculate the concentration of Human PSMA in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human PSMA concentrations in serum, plasma and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	84373355
NCBI GeneID	3855492
Molecular Weight	32,116 Da
NCBI Official Full Name	PsmA
NCBI Official Symbol	psmA
NCBI Protein Information	proteasome complex, subunit alpha; proteasome subunit alpha
UniProt Protein Name	Proteasome subunit alpha
UniProt Gene Name	psmA
UniProt Entry Name	Q2NEX8_METST

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
