

AF (Total Aflatoxin) ELISA Kit | AF elisa kit

AF (Total Aflatoxin) ELISA Kit

CATALOG #
AAA22112

PRODUCT SYNONYMS

AF (Total Aflatoxin); AF (Total Aflatoxin) ELISA Kit; Aflatoxin; AF elisa kit

PRODUCT SPECIFICATIONS

Assay Type	Quantitative Competitive
Preparation and Storage	Store at 2-8 degree C. Avoid freeze/thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for AF elisa kit	Principle of the Assay: This kit uses Competitive-ELISA as the method for the quantitative detection. It can detect Total Aflatoxin (AF) in samples, such as cereals, formula feed, edible oil, etc. This kit is composed of ELISA Microtiter plate, HRP conjugate, antibody working solution, standard and other supplementary reagents. The microtiter plate in this kit has been pre-coated with coupled antigen. During the reaction, AF in the samples or standard competes with coupled antigen on the solid phase supporter for sites of anti-AF antibody. Then Horseradish Peroxidase (HRP) conjugate is added to each microtiter plate well, and substrate reagent is added for color development. There is a negative correlation between the OD value of samples and the concentration of AF. The concentration of AF in the samples can be calculated by comparing the OD of the samples to the standard curve.
Product Categories/Family for AF elisa kit	ELISA-Mycotoxin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
