### PRODUCT SYNONYMS

TLX; Polyclonal Antibody; Rabbit anti-TLX Antibody; Nuclear receptor subfamily 2 group E member 1; Nuclear receptor TLX; Protein tailless homolog; TIL; hTIL; anti-TLX antibody

### PRODUCT SPECIFICATIONS

|                                               |                                                                                                           |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| Host                                          | Rabbit                                                                                                    |
| Reactivity                                    | Human, Mouse, Rat                                                                                         |
| Clonality                                     | Polyclonal                                                                                                |
| Purity/Purification                           | The antibody was purified by immunogen affinity chromatography.                                           |
| Form/Format                                   | Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide. |
| Concentration                                 | 1mg/mL (varies by lot)                                                                                    |
| Applicable Applications for anti-TLX antibody | IC (Immunochemistry), IF (Immunofluorescence), WB (Western Blot)                                          |
| Immunogen                                     | Recombinant full length protein of human TLX                                                              |
| Preparation and Storage                       | Store at -20 degree C. Avoid repeated freeze/thaw cycles.                                                 |

### IMAGES

#### IF (Immunofluorescence)

Immunofluorescent analysis of TLX staining in HepG2 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a DyLight 594-conjugated secondary antibody (red) in PBS at room temperature in the dark.

#### WB (Western Blot)

Western blot analysis of TLX expression in HepG2 (A), Jurkat (B), mouse liver (C) whole cell lysates.
