

Human Anti-growth hormone antibody (GHAb) ELISA Kit | GHAb elisa kit

Human Anti-growth hormone antibody (GHAb) ELISA Kit

CATALOG #
AAA224164

REACTIVITY
Human

PRODUCT SYNONYMS

Anti-growth hormone antibody (GHAb); Human Anti-growth hormone antibody (GHAb) ELISA Kit; GHAb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of anti-GHAb antibody.
Detection Range	7.81-500pg/mL
Sensitivity	<2.19pg/mL
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for GHAb elisa kit

This assay employs a two-site sandwich ELISA to quantitate anti-GHAb antibody in human serum, plasma. An GHAb antigen has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any anti-GHAb antibody present is bound by the immobilized antigen. After removing any unbound substances, a biotin-conjugated antigen specific for anti-GHAb antibody is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of anti-GHAb antibody bound in the initial step. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
