Applicable Applications for anti-TNFR2 antibody	IHC (Immunohistochemistry), WB (Western Blot)
Biological Significance	TNF RII is a high affinity receptor for TNF-alpha and -beta, potent mediators of multiple aspects of inflammatory immune responses. RII is a prototypic member of the TNF receptor superfamily and has been designated TNFRSF1B. Whereas all cell types are thought to express TNF RI, TNF RII expression is limited primarily to hematopoietic cells and cells of the immune system. Most of the biological functions of TNF are mediated via TNF RI.
Immunogen	A synthetic peptide corresponding to a sequence in the middle region of human TNFR2/TRNFRSF1B(103-121aa,DQVETQACTREQNRICTCR).
Preparation and Storage	4°C short term, -20°C long term. Avoid repeat freeze/thaw cycles.
