Biological Significance	Rotaviruses belong to the family of Reoviridae, and complete viral particles have a triple-layered icosahedral protein capsid that surrounds the genome of 11 segments of double-stranded RNA, which encode six structural proteins and six nonstructural protein.
Expression System	E Coli
Tag/Conjugate	His tag
Reconstitution	Reconstitute with sterile laboratory grade water to a concentration of 0.1 to 1mg/ml and use immediately. For longer term storage in liquid form, add glycerol @ 5 to 50% final concentration. (50% recommended).
Preparation and Storage	Upon receipt store at -20 degree C to -80 degree C. Recommended shelf life is 1 year in the lyophilized format. Once reconstituted use within 6 months of reconstitution. Avoid repeated freeze thaws of reconstituted product.
