

Rabbit IKK alpha Polyclonal Antibody | anti-IKK alpha antibody

IKK alpha antibody

CATALOG # AAA224809	HOST Rabbit	APPLICATIONS Western Blot, Immunohistochemistry
-------------------------------	-----------------------	---

PRODUCT SYNONYMS

IKK alpha; Polyclonal Antibody; IKK alpha antibody; Rabbit polyclonal IKK alpha antibody; Polyclonal IKK alpha antibody; Anti-IKK alpha antibody; Phospho Thr23 antibody; anti-IKK alpha antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Clonality	Polyclonal
Purity/Purification	Purified by immunoaffinity chromatography.
Form/Format	Liquid form in PBS buffer (no MG2+ or Ca2+), pH 7.4, 150 mm NaCl, 0.02% sodium azide and 50% glycerol.
Concentration	1 mg/ml (varies by lot)
Applicable Applications for anti-IKK alpha antibody	WB (Western Blot), IHC (Immunohistochemistry)
Immunogen	IKK alpha antibody was raised in Rabbit using the peptide sequence around phosphorylation site of threonine 23 (L-G-T(p)-G-G) derived from Human IKK A as the immunogen.
Cross-Reactivity	Human, Mouse, Rat
Preparation and Storage	Store at 4 degree C for short term storage. Aliquot and store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.

IMAGES

WB (Western Blot)

Western Blot analysis of extracts from 293 cells untreated or treated with TNF using IKK α (Phospho-Thr23) antibody

IHC (Immunohistochemistry)

Immunohistochemical analysis of paraffin-embedded human colon carcinoma tissue using IKK α (Phospho-Thr23) antibody (left) or the same antibody preincubated with blocking peptide (right)

ADDITIONAL INFORMATION

Related Product Information for anti-IKK alpha antibody	IKK-alpha a kinase of the IKK family. Phosphorylates inhibitors of NF-kappa-B, leading to their dissociation from NF-kappa-B and ultimately to their degradation. Phosphorylated and activated downstream of growth factor receptors, IL1R, and TNFR by NAK, IRAK and NIK, respectively. Preferentially found as a heterodimer with IKK-beta but also as an homodimer.
--	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
