Immunofluorescence analysis of paraformaldehyde-fixed HeLa, using CtBP1 antibody at 1:200 dilution.

ADDITIONAL INFORMATION

Related Product Information for anti-CTBP1 antibody	This gene encodes a protein that binds to the C-terminus of adenovirus E1A proteins. This phosphoprotein is a transcriptional repressor and may play a role during cellular proliferation. This protein and the product of a second closely related gene, CTBP2, can dimerize. Both proteins can also interact with a polycomb group protein complex which participates in regulation of gene expression during development.
