ADDITIONAL INFORMATION

Related Product Information for anti-ASB9 antibody	This gene encodes a member of the ankyrin repeat and suppressor of cytokine signaling box protein family. Members of this family can interact with the elongin B-C adapter complex via their SOCS box domain and further complex with the cullin and ring box proteins to form E3 ubiquitin ligase complexes. They may function to mediate the substrate-recognition of the E3 ubiquitin ligases. A transcribed pseudogene of this gene has been identified on chromosome 15.
