ADDITIONAL INFORMATION

Related Product Information for anti-p27 antibody	p27 is also known as cyclin-dependent kinase inhibitor 1B, an enzyme that in humans is encoded by the CDKN1B gene. It encodes a protein which belongs to the Cip/Kip family of cyclin dependent kinase (Cdk) inhibitor proteins. The encoded protein binds to and prevents the activation of cyclin E-CDK2 or cyclin D-CDK4 complexes, and thus controls the cell cycle progression at G1.
