

## Mouse Testosterone Monoclonal Antibody

Testosterone, Feline Antibody

|                               |                      |                                            |
|-------------------------------|----------------------|--------------------------------------------|
| CATALOG #<br><b>AAA226453</b> | HOST<br><b>Mouse</b> | APPLICATIONS<br><b>Lateral Flow, ELISA</b> |
|-------------------------------|----------------------|--------------------------------------------|

### PRODUCT SYNONYMS

Testosterone; Monoclonal Antibody; Feline Antibody; anti-Testosterone antibody

### PRODUCT SPECIFICATIONS

|                                                        |                                                                                                            |
|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| Host                                                   | Mouse                                                                                                      |
| Clonality                                              | Monoclonal                                                                                                 |
| Isotype                                                | IgG1                                                                                                       |
| Specificity                                            | Testosterone                                                                                               |
| Purity/Purification                                    | Purified Monoclonal Antibody. Purity: >90% by SDS-PAGE                                                     |
| Form/Format                                            | 0.015M Potassium Phosphate, pH 7.2 with 0.85% Sodium Chloride<br>Ion Exchange Purified Monoclonal Antibody |
| Concentration                                          | 6.8mg/mL (varies by lot)                                                                                   |
| Applicable Applications for anti-Testosterone antibody | LF (Lateral Flow), ELISA                                                                                   |
| Immunogen                                              | Testosterone-KLH                                                                                           |
| Preservative                                           | 0.05% Sodium Azide                                                                                         |
| Preparation and Storage                                | Short Term: 2-8 degree C. Long Term: ≤20 degree C. Avoid repeated freezing and thawing.                    |

### ADDITIONAL INFORMATION

|                                                          |                                     |
