

PA Janelia Fluor 646, SE Biochemical

PA Janelia Fluor 646, SE

CATALOG #
AAA228092

PRODUCT SYNONYMS

PA Janelia Fluor 646; SE; SE biochemical

PRODUCT SPECIFICATIONS

Purity/Purification	98%
CAS	2093120-32-0
Solubility	<1mg/ml refers to the product slightly soluble or insoluble
Preparation and Storage	Powder: -20 degree C for 3 years In solvent: -80 degree C for 2 years

IMAGES

Structure
AP14145 hydrochloride, CAS 2387505-59-9

Structure
AP14145 hydrochloride, CAS 2387505-59-9

ADDITIONAL INFORMATION

Related Product Information for PA Janelia Fluor 646, SE biochemical	PA Janelia Fluor 646, SE (PA-JF646-NHS), a photoactivatable fluorescent dye, is an NHS ester for coupling to primary amine groups. PA-JF646-NHS is non-fluorescent until activated at 365 nm. NHS ester can be converted to relevant substrate for use in self-labeling tag systems, e.g. HaloTag and SNAP-tag. PA-JF646-NHS is used for single molecule tracking and super resolution microscopy in live cells, specifically live cell sptPALM and fixed cell PALM. (lambda Excitation/emission ~650/664 nm). Janelia Fluor products are licensed under U.S. Pat. Nos. 9,933,417, 10,018,624 and 10,161,932 and other patents from Howard Hughes Medical Institute.
