

Mipomersen sodium Biochemical

Mipomersen sodium

CATALOG #
AAA228815

PRODUCT SYNONYMS

Mipomersen sodium; Triethylene glycol diallyl ether; Mipomersen sodium biochemical

PRODUCT SPECIFICATIONS

Purity/Purification	98%
CAS	629167-92-6
Solubility	<1mg/ml refers to the product slightly soluble or insoluble
In vitro	Mipomersen predominantly distributes to the liver and decreases the production of apoB-100, the primary structural protein of the atherogenic lipoproteins including low density lipoprotein (LDL), thereby reducing plasma LDL-cholesterol and apoB-100 concentrations[2]. Apolipoprotein (apo) B, a large amphipathic protein, plays a fundamental role in human lipoprotein metabolism. ApoB-100 is also a ligand for LDL receptor-mediated endocytosis of LDL by cells[2].
Preparation and Storage	Powder: -20 degree C for 3 years In solvent: -80 degree C for 2 years
