ADDITIONAL INFORMATION

Related Product Information for anti-FOXP3 antibody	Probable transcription factor. Plays a critical role in the control of immune response. This protein is a member of the forkhead/winged-helix family of transcriptional regulators. Defects in this gene are the cause of immunodeficiency polyendocrinopathy, enteropathy, X-linked syndrome (IPEX), also known as X-linked autoimmunity-immunodeficiency syndrome. Alternatively spliced transcript variants encoding different isoforms have been identified.
