ADDITIONAL INFORMATION

Related Product Information for anti-ASGR1 antibody	This is a rabbit polyclonal antibody against ASGR1. It was validated on Western Blot using a cell lysate as a positive control. Target Description: ASGR1 encodes for a cell surface receptor binds to galactose-terminated glycoproteins. It transports these glycoproteins via a series of membrane vesicles and tubules to an acidic-sorting organelle where the receptor and ligand dissociates. Then the receptor is recycled back to the cell surface.
