ADDITIONAL INFORMATION

Related Product Information for anti-CELF2 antibody	This is a rabbit polyclonal antibody against CUGBP2. It was validated on Western Blot using a cell lysate as a positive control. Target Description: Members of the CELF/BRUNOL protein family contain two N-terminal RNA recognition motif (RRM) domains, one C-terminal RRM domain, and a divergent segment of 160-230 aa between the second and third RRM domains. Members of this protein family regulate pre-mRNA alternative splicing and may also be involved in mRNA editing, and translation. Alternative splicing results in multiple transcript variants encoding different isoforms.
